

Spectacular Science Three Types of Pollution

Fill-in-the Blanks!

Directions:

Look at the types of pollution and descriptions below. You will see that certain words are replaced with a blank. Your job is to fill in those blanks using the word bank. Use the Spectacular Science episode to help you.

Write your answers in the blanks.

Look at the last page for the answer key.

Good luck!

Word Bank:

Trash, gases, surface, soil, chemicals, oceans, pollutants, drinking, marine, atmosphere, Climate Change

Land Pollution

Is when humans put _____, _____, or waste on land. The _____ can get polluted and the pollutants can work their way down deeper. This is bad for plants and animals that live on the _____ of the Earth and under.

Spectacular Science Three Types of Pollution

Fill-in-the Blanks!

Answer Key

Word Bank:

Trash, gases, surface, soil, chemicals, oceans, pollutants, drinking, marine, atmosphere, Climate Change

Land Pollution

Is when humans put trash, chemicals, or waste on land. The soil can get polluted and the pollutants can work their way down deeper. This is bad for plants and animals that live on the surface of the Earth and under.

Water Pollution

Is when humans put trash and other pollutants inside of water. This can be in streams, rivers, or in big oceans! The pollution can affect marine life and sometimes humans! The pollution can end up in our drinking water.

Air Pollution

Is when humans release gases and waste into the air around us. These gases make their way into Earth's atmosphere. Air pollution is the leading cause of Climate Change.
