

Spectacular Science

Is It Renewable?

Directions:

Look at the natural resources listed below. Your job is to identify and record which resources are renewable. Write your answers down in the box under the list of resources.

Remember,
renewable means that we can constantly renew or get more of these resources. They can be replaced in a human lifetime or less.

Look at the last page for the answer key.

Good luck!

Natural Resources:

Wind, coal, water, nuclear energy, sunlight, trees, crops, natural gas, iron, rocks, and minerals

Renewable Natural Resources Out of the List Above:
